

AltiumLive 2019 Annual PCB Design Summit

An abstract geometric pattern of interconnected lines and dots in shades of yellow and orange, resembling a network or a complex circuit board layout, is located in the top right corner of the page.

Dear _____,

I'd like to attend the upcoming AltiumLive 2019: Annual PCB Design Summit taking place on Oct. 9-11 in San Diego. I've researched many design conferences and this is the best conference to attend for engineers, PCB designers and other technologists that want to expand their skills and grow their expertise. This would be an exceptional opportunity to get hands-on training and learn from some of the very best in the industry.

This isn't the average conference, it's a truly immersive experience where all members of the electronics community gather to learn and collaborate to solve the issues that directly impact us. Last year, over 600 people attended AltiumLive from all spectrums of the electronics industry. I'm certain that this event will be an incredibly valuable and enriching experience that will only enhance my professional development.

HERE'S WHAT'S INCLUDED:

- 4 Technical Keynotes from Industry Icons
- 8 Technical User Presentations
- 6 Professional Development Courses
- 8 Altium University Day Learning Sessions
- Networking Opportunities
- Meet-and-Greet with Altium Developers

Attending AltiumLive will help me better evaluate the impact of my work, optimize my performance and enhance my skills to become a better _____.

Thank you.
